MEMORANDUM

TO: Information System Users

FROM: Simon O'Shea

SUBJECT: Royal College Updated Bibliography

Enclosed you will find reference pages from Smoking and Health Now, the second Report of the Royal College of Physicians.

This is an updated list which contains accession numbers of all cited documents which are currently in the system. Accession numbers in parentheses refer to documents in the system which are not identical to the references cited, but which we believe to be very similar.

Cited documents which are not currently in the system will be evaluated for input in the near future. Users will be notified when such documents enter the system.

This replaces the bibliography referred to in the memorandum of February 9, 1971.
